

## A Solution for Every Application

DAF Trucks offers a wide range of vehicle configurations to ensure the right solution for your specific application is always delivered. Class-leading tools will support you with every step in the process to configure your desired vehicle. Plus, DAF's knowledgeable dealer and bodybuilder network is available to provide advice and support whenever needed.

### Plug & Play

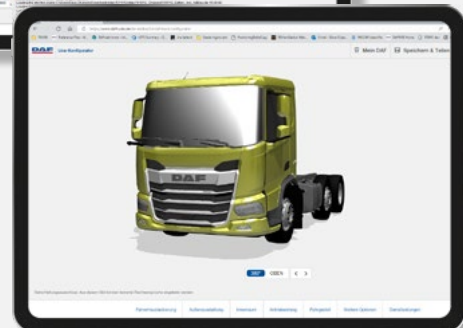

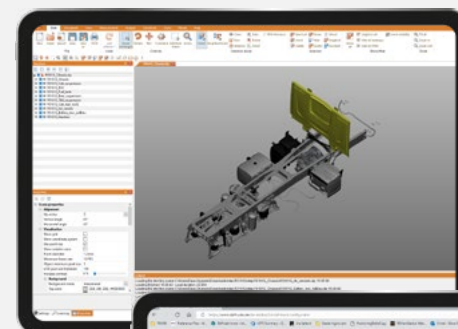

With the introduction of the New Generation series, DAF has strengthened its collaboration with body manufacturers all over Europe. The result is a seamless process where your desired specification is just one click away. This not only ensures an easy fit between chassis and body, but it also enables software integration to simplify data sharing and communications between DAF dealer, body manufacturer and you as customer. Full interaction with the body via the dashboard controls and a wide range of informative symbols on our digital display – all add up to a simplified process and the guaranteed delivery of your perfect DAF.

### Configure your perfect DAF

DAF offers a complete suite of integrated systems designed to support customers, dealers and bodybuilders during the process of vehicle configuration. The DAF visualisation tool, located on our website, enables customers to familiarise themselves with our truck range and all available options by viewing selections applied to an accurate 3D truck model of their chosen vehicle.

For our dealers, this is supplemented with calculation and simulation software to prepare for every load imaginable, customising the truck to ultimately fit our customers' needs and meet applicable legal requirements. Our bodybuilders have access to every detail of the truck, far in advance of production. This includes downloadable vehicle specific 2D and 3D drawings, combined with detailed descriptions for all chosen options, and step-by-step guidance on how these can be utilised for optimal chassis to body integration.

## DAF Services

### DAF MULTISUPPORT

Maximise Uptime. Increase fleet efficiency. When it comes to flexibility, cost transparency and uptime, a DAF MultiSupport repair and maintenance package is your best choice. Tailored packages including pro-active maintenance planning using real time vehicle data, to help you keep your trucks in excellent condition and on the road.

### PACCAR FINANCIAL

As DAF's in-house finance provider, PACCAR Financial provides tailored and complete financial services to the transport sector. A unique understanding of your day-to-day business makes PACCAR Financial your partner of choice.

### DAF INTERNATIONAL TRUCK SERVICE (ITS)

Accidents and breakdowns are an inevitable part of the transport business, even for the best trucks. So it's good to know that DAF's International Truck Service (ITS) is just a telephone call away. That's all that's needed to summon help, no matter where you are in Europe. 24 hours a day, 365 days a year, service is available from local mechanics who do everything possible to get your truck back on the road fast.

### PACCAR PARTS

PACCAR Parts supplies PACCAR genuine parts and DAF genuine parts along with over 80,000 universal TRP parts for all makes of truck and trailer, including workshop supplies. From its own distribution centres, PACCAR Parts delivers within 24 hours throughout Europe and the rest of the world.

### DAF DEALER NETWORK

With our extensive network of professional sales and service dealers, there's always a DAF representative nearby. Highly qualified DAF mechanics have in-depth knowledge of your vehicle, ensuring fast, effective repair and maintenance, using original PACCAR, DAF and TRP parts. This guarantees maximum vehicle availability and high residual value.

### DAF CONNECT

In our drive for transport efficiency, the upgraded DAF Connect Fleet Management Platform gives you realtime performance insights of your trucks and drivers. The user-friendly portal can be customised to present all important information you need. DAF Connect: More Uptime, More Insights and More Efficiency.

# The Future of Applications

The all-new DAF XDC and XFC are the latest models to join the New Generation DAF Series, all optimised for the best off-road performance. Additionally, DAF has expanded its 2, 3 and 4-axle product portfolio, paving the way to use a New Generation DAF truck for every application.

## Construction Styling

As members of the award-winning New Generation DAF range, the XDC and XFC have all the industry leading benefits, including class-leading field of vision, incredible reliability, low operational costs and outstanding driver comfort.

Designed specifically for off-road and construction applications, both the XDC and XFC feature a 3-piece robust steel bumper, radiator protection, integrated fog lights and a higher ground clearance. Plus, the rugged front styling further highlights the toughness of these vehicles.

This practical approach to operating in tough conditions also extends to the interior, with highly durable vinyl surfaces and preparation for hard wired bodybuilder switches, maintaining the premium interior feel after body works are complete.

The 3 piece robust steel bumper is also available on all other vehicle configurations, with optional body colour, to optimise vehicle applications operating in urban areas with high curbs and other obstacles.

RADIATOR PROTECTION

BLACK GRILLE STRIPS

3-PIECE STEEL BUMPER

SWINGSTEP (OPTIONAL)

## Hooklift

- High payload capabilities
- Robust and stable chassis
- Excellent off-road handling

The New Generation DAF XD/XF with hooklift system features a robust 3-piece bumper and chassis. Powerful drivelines ensure optimal vehicle usability and uptime across any environment or situation.

## Flatbed & Crane

- Deliverable with 10T rated front axle
- Extremely small turning circle
- Robust 3-piece steel bumper

Ideal for delivering building materials to a tight location on a construction site, the New Generation DAF XD/XF Flatbed with crane offers maximum manoeuvrability and a robust chassis for higher payloads. Built to be highly versatile, the crane can be positioned behind the cab, at the rear of the chassis or create your own tailor-made solution.

## Concrete Mixer

- Superb traction in difficult terrain
- Low chassis weight for maximum payload
- High front approach angle

The New Generation DAF XDC/XFC Mixer combines a lightweight vehicle chassis with a robust cab structure to deliver a high payload and maximum uptime. Plus, optimised drivelines ensure the smoothest ride even on tough terrain.

## Tipper

- Extremely Robust
- Excellent off-road capabilities
- High maximum payload

With an extremely robust chassis, 3-piece bumper and a powerful driveline, the New Generation DAF XDC/XFC is suitable for Tipper bodies, designed to meet the toughest of tasks across any terrain.
